DATE MAILED:

**Please find below and/or attached an Office communication concerning this application or proceeding.**

**Commissioner for Patents**

In response to applicants' request to consider the IDS filed 5/27/05 the following applies. The IDS was not overlooked by the examiner. In the first action on the merits mailed on 5/29/08 on p.10 the examiner informed applicants that NONE of the references for this IDS was present in the file. Thus copies of such are still needed for consideration. It is noted that the first 2 entries in the NPL section do not provide a date which is required by MPEP 609. The two entries state the source is from the "Amercian Chemical Society". If this is really correct the journal should be cited along with a publication date. If the compounds were obtained from File ChemCats then the dates for all the RN #'s must be indicated as separate entries if they are different. Typical entries for this type of citation can be found in patents such as 7,482,347 or 7,491,827 or 7,517,986.

/Emily Bernhardt/  
Primary Examiner, Art Unit 1624
